Schedule #1—General Information (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Part 3: Schedules Required for New or Amended Applications

An X in the "New" column indicates a required schedule that must be submitted as part of any new application. The applicant must mark the "New" checkbox for each additional schedule submitted to complete the application.

For amended applications, the applicant must mark the "Amended" checkbox for each schedule being submitted as part of the amendment.

Schedule #	Schedule Name	Application Type	
		New	Amended
1	General Information	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
2	Required Attachments and Provisions and Assurances	<input checked="" type="checkbox"/>	N/A
3	Certification of Shared Services	<input type="checkbox"/>	<input type="checkbox"/>
4	Request for Amendment	N/A	<input checked="" type="checkbox"/>
5	Program Executive Summary	<input checked="" type="checkbox"/>	<input type="checkbox"/>
6	Program Budget Summary	<input checked="" type="checkbox"/>	<input type="checkbox"/>
7	Payroll Costs (6100)	See Important Note For Competitive Grant*	<input type="checkbox"/>
8	Professional and Contracted Services (6200)		<input type="checkbox"/>
9	Supplies and Materials (6300)		<input type="checkbox"/>
10	Other Operating Costs (6400)		<input type="checkbox"/>
11	Capital Outlay (6600)		<input type="checkbox"/>
12	Demographics and Participants to Be Served with Grant Funds	<input checked="" type="checkbox"/>	<input type="checkbox"/>
13	Needs Assessment	<input checked="" type="checkbox"/>	<input type="checkbox"/>
14	Management Plan	<input checked="" type="checkbox"/>	<input type="checkbox"/>
15	Project Evaluation	<input checked="" type="checkbox"/>	<input type="checkbox"/>
16	Responses to Statutory Requirements	<input checked="" type="checkbox"/>	<input type="checkbox"/>
17	Responses to TEA Requirements	<input checked="" type="checkbox"/>	<input type="checkbox"/>
18	Equitable Access and Participation	<input checked="" type="checkbox"/>	<input type="checkbox"/>
19	Private Nonprofit School Participation	<input checked="" type="checkbox"/>	<input type="checkbox"/>
21	Program Information Addendum	<input checked="" type="checkbox"/>	N/A

***IMPORTANT NOTE FOR COMPETITIVE GRANTS:** Schedules #7, #8, #9, #10 and #11 are required schedules if any dollar amount is entered for the corresponding class/object code on Schedule #6—Program Budget Summary. For example, if any dollar amount is budgeted for class/object code 6100 on Schedule #6—Program Budget Summary, then Schedule #7—Payroll Costs (6100) is required. If it is either blank or missing from the application, **the application will be disqualified.**

Part 4: Single Audit Compliance for IHEs and Nonprofit Organizations

INSTRUCTIONS: This part of Schedule #1 is required only for colleges, universities, and nonprofit organizations (other than open-enrollment charter schools)

Enter the start and end dates of your fiscal year in Section 1.

In Section 2, check the appropriate box to indicate whether or not your organization is included in the annual statewide single audit.

Public IHEs are generally included, and nonprofit organizations are generally not included.

Section 1: Applicant Organization's Fiscal Year

Start date (MM/DD): 09/01

End date (MM/DD): 08/31

Section 2: Applicant Organizations and the Texas Statewide Single AuditYes: ☐No: ☒**For TEA Use Only**

Schedule #2—Required Attachments and Provisions and Assurances

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Part 1: Required Attachments

The following table lists the fiscal-related and program-related documents that are required to be submitted with the application (attached to the back of each copy, as an appendix).

#	Applicant Type	Name of Required Fiscal-Related Attachment
1.	Nonprofit organizations, excluding ISDs and open-enrollment charter schools	Proof of nonprofit status (see <u>General and Fiscal Guidelines</u> , Required Fiscal-Related Attachments, for details)
#	Name of Required Program-Related Attachment	Description of Required Program-Related Attachment
1.	Written Agreements	Written agreements or memoranda of understanding are required for partnerships involving school districts, community-based organizations, or other organizations that work on behalf of the contractor to manage the daily operations of the program. Written agreements are also required for partners that are significantly involved in the development and/or implementation of the program. They are not required for providers of single services, such as a physical activity provider or instructional coach. For example, a district may act as the fiscal agent but manage a contract for a provider to operate the program or host programs at school or non-school locations.

Part 2: Acceptance and Compliance

By marking an X in each of the boxes below, the authorized official who signs Schedule #1—General Information certifies his or her acceptance of and compliance with all of the following guidelines, provisions, and assurances.

Note that provisions and assurances specific to this program are listed separately, in Part 3 of this schedule, and require a separate certification.

X	Acceptance and Compliance
<input checked="" type="checkbox"/>	I certify my acceptance of and compliance with the <u>General and Fiscal Guidelines</u> .
<input checked="" type="checkbox"/>	I certify my acceptance of and compliance with the <u>program guidelines for this grant</u> .
<input checked="" type="checkbox"/>	I certify my acceptance of and compliance with all <u>General Provisions and Assurances</u> requirements.
<input checked="" type="checkbox"/>	I certify that I am not debarred or suspended. I also certify my acceptance of and compliance with all <u>Debarment and Suspension Certification</u> requirements.
<input checked="" type="checkbox"/>	I certify that this organization does not spend federal appropriated funds for lobbying activities and certify my acceptance of and compliance with all <u>Lobbying Certification</u> requirements.
<input checked="" type="checkbox"/>	I certify my acceptance of and compliance with <u>No Child Left Behind Act of 2001 Provisions and Assurances</u> requirements.

Schedule #2—Required Attachments and Provisions and Assurances

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Part 3: Program-Specific Provisions and Assurances☒ I certify my acceptance of and compliance with all program-specific provisions and assurances listed below.

#	Provision/Assurance
1.	The applicant provides assurance that funds awarded under this program will be used to increase the level of state, local, and other non-federal funds that would, in the absence of funds under this part, be made available for programs and activities authorized under this part, and in no case supplant federal, state, local, or non-federal funds.
2.	The applicant provides assurance that the application does not contain any information that would be protected by the Family Educational Rights and Privacy Act (FERPA) from general release to the public.
3.	The applicant provides assurance that the program will take place in a safe and accessible facility.
4.	The applicant provides assurance that the proposed program was developed, and will be carried out in active collaboration with the schools that students attend.
5.	The applicant provides assurance that the program will target students who attend schools eligible for schoolwide programs and the families of such students.
6.	The applicant provides assurance that the community has been given notice of an intent to submit an application and that the application and any waiver request will be available for public review after submission of the application.
7.	The applicant provides assurance that it has selected feeders and centers in a manner designed to serve students that are most in need of the additional services based on a comprehensive systematic assessment of the needs of students and families and the resources of campuses and the community. The applicant also provides assurance that it will annually conduct a needs assessment and an updated program implementation plan based on the results of the annual needs assessment.
8.	The applicant provides assurance that it will comply with all reporting schedules and deadlines including data entry schedules, as required for state and federal reporting.

Schedule #3—Certification of Shared Services

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

I, as one of the below member entity authorized officials, certify that to the best of my knowledge, the information contained in this application is correct and complete, that the entity that I represent has authorized me to file this application, and that such authorization action is recorded in the minutes of the local agency's board meeting.

The participating or intermediate education agency named has been designated as the administrative and fiscal agent for this project and is authorized to receive and expend funds for the conduct of this project. The fiscal agent is accountable for all shared services arrangement (SSA) activities and is therefore responsible for ensuring that all funds including payments to members of SSAs are expended in accordance with applicable laws and regulations.

All participating agencies have entered into a written SSA agreement that describes the responsibilities of the fiscal agent and SSA members, including the refund liability that may result from on-site monitoring or audits and the final disposition of equipment, facilities, and materials purchased for this project from funds specified below.

It is understood that the fiscal agent is responsible for the refund for any exceptions taken as a result of on-site monitoring or audits; however, based upon the SSA agreement, which must be on file with the fiscal agent for review, the fiscal agent may have recourse to the member agencies where the discrepancy(ies) occurred.

Any additional funds that result from an increase will not require additional signatures. **Each member identified below acknowledges accountability for the requirements contained in the provisions and assurances listed in Schedule #2, Parts 2 and 3, as applicable.** Each member entity certifies its agreement to participate in this SSA, as stated throughout this grant application.

#	County-District # and Name	Authorized Official Name and Signature	Telephone Number and Email Address	Funding Amount
Fiscal Agent

Schedule #5—Program Executive Summary

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Provide an overview of the program you plan to deliver. Be sure to address fundamental issues such as an overview of your community, the need for the program, and a general description of the program to be implemented. Be sure to align your description with the purpose and goals of this Request for Application. Address new and expanded services that will be made available by the program. Refer to the instructions for a description of the requested elements of the summary. Response is limited to space provided, front side only, font size no smaller than 10 point Arial.

Littlefield ISD (LISD - fiscal agent), Cotton Center ISD (CCISD), Muleshoe ISD (MISD), and O'Donnell ISD (OISD), the consortium, are working with Gary Lee Frye, Ed.D., GPC to develop out-of-school-time programs that uses current ISD programs, Campus and District Improvement Plans (CIP/DIP), and College and Career Readiness efforts to develop an extended and differentiating instruction that meets all students' academic, social/emotional, and fitness needs by building a 21st Century Community Learning Centers (21CCLC) program that allows students to become Controlling Agent of Their Own Learning. Why make students Controlling Agents? The Bureau of Labor Statistics (2014) predicts that today's student will have at least 12 to 15 different careers in their lifetime with 65% of these careers not yet invented - because our students will be the ones who create them! This makes the statement "becoming a life-long learner" much more important today than ever before. We must extend "normal" preK-12 education beyond the TEKS (Texas Essential Knowledge and Skills) to allow students to evaluate information and recombine it in ways that create something new: a mission of learning with no finish line. The content area TEKS must all still be taught to give students the base of knowledge to move to become life-long learners for the 21st Century. The consortium will do this by having an effective 21CCLC program that lets students go beyond the TEKS to use multi-content area knowledge to create new frameworks that are based in the real world. In other words, students must take what they learning in the classroom, blend it with information gained on the Net, and evaluate what they are seeing to create a new view of the world. Effective use of the 21CCLC programs will allow extended and differentiating instruction to be done with all sub-groups of students appropriate to their abilities (Gifted & Talented (GT) to Intellectually Disabled (ID) to English Language Learners (ELL), etc.) because we will have additional time and resources to extend the regular day learning efforts of all our students.

The consortium and Dr. Frye have a working relationship beginning with cycle 3 21CCLC with OISD, cycle 5 with LISD & MISD, and CCISD as a new members. These grants use UDL (Universal Design for Learning) and BYOD (Bring Your Own Device) concepts to have different academic instructional methods that went beyond the regular school day instruction. These concepts were aligned to RTI (Response To Intervention) model that TEA has as a state standard for addressing special students needs so the consortium can meet Tier II and III interventional needs of all sub-populations with the effective use of technology (Wexler, 2011). Last, a pilot program using a "Flipped Classroom Model" (Bergmann and Sams, 2012) within the STEM core content areas has shown promise and being linked to this 21CCLC project (Science, Technology, Engineering, & Math and add Art moving towards STEAM that involves more student populations). The Flipped Classroom with UDL/BYOD/RTI systems allowed the instructional staff and the students to increase their understanding effective use of technology to become active life-long learners who have ownership of their ongoing academic and career skills building. This provides a real world rationale for having a lending technology program that meets the goals of this grant and the CIP/DIP goals of each of the schools to extend student learning through the effective use of technology. Wise and Schwartzbeck (2013) stated that "technology makes learning available 24/7" that when taken with UDL/BYOD promotes life-long learning. UDL/BYOD concepts (Dalton & Smith, 2013; Hall, Meyer, & Rose, 2012; Roschelle, Courey, Patton, & Murray, 2013; and Tegmark-Chita, Gravel, Serpa, Domingos, & Rose, 2012) that use 'smart devices' to provide 24/7/365 access to learning materials again promoting life-long learning. This aligns with the historical concepts of learning styles of Dunn and Dunn (1990) that having multi-methods of instruction through many modalities allow for each student's best method of receiving instruction to be done. The Flipped Classroom system will allow students to have more ownership of their learning, increasing equitable access, because they will see how they are in control of their learning - no long can they just "sit and get" from the teacher's lectures but they must actively engage in learning (Bergmann and Sams, 2012, Flay, 2010; Oakes and Lane, 2011; Oakes, Lane, Cox, Magrane, Jenkins, and Hankins, 2012; and Lewis, DuBois, Bavarian, Acock, Silverthorn, Day, Ji, Vuchinich, and Flay, 2013). All of these evidence base programs with the CIP/DIP were used to create the initial framework of this 21CCLC program. Our goals for the 21CCLC are: **Students learn more deeply.** As a result of students taking responsibility, interacting meaningfully and often with their instructor and peers, and getting and giving frequent feedback, they acquire a deeper understanding of the content and how to use it. **Students are more active participants in learning.** The student role shifts from passive recipient to active constructor of knowledge, giving them

Schedule #5—Program Executive Summary (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Provide an overview of the program you plan to deliver. Refer to the instructions for a description of the requested elements of the summary. Response is limited to space provided, front side only, font size no smaller than 10 point Arial.

opportunities to practice using the intellectual tools of the discipline. **Interaction increases and students learn from one another.** Student's work together applying course concepts with guidance from teachers inside and outside the classroom. **Instructors and students get more feedback.** With more opportunities for students to apply their knowledge and therefore demonstrate their ability to use it, gaps in their understanding become visible to both themselves and the instructor. This increased interaction helps to create a learning community that encourages them to build knowledge together inside and outside the classroom. **Instructors and students get more feedback.** We believe that this framing of the 21CCLC program will allow our students to become Controlling Agent's and be College and Career Ready. Research on past 21CCLC grant that Dr. Frye wrote suggest the consortium will have these results. Hammon (2009) showed that the public & charter schools in the funded 21CCLC programs were having their local needs met in a manner that resulted in a general raising of TAKS scores (state high stakes tests at the time), class grades, increased attendance, and lowering of discipline problems for students at the 19 public and 4 charter schools. All of these Promising Practices / Evidence results and CIP/DIP along with 21CCLC surveys are being used to create programs and services that can move towards evidence based understanding of the most effective items that will meet the student, parent, and staff needs. Almost 400 surveys have been returned as of Friday before start of spring break with almost 100 stakeholders saying they would serve on campus/district Taskforces. These surveys were given to all the stakeholders of the schools (approximately 3,325). Students and parents themes were to have homework help, methods to better understand how to continue post-secondary education (college and technology), having "fun" enrichment activities, and a safe place for the students to be until the parents finished work. The working parents also wanted activities after 6pm where they could attend. The students stated that they wanted "better food." The staff had similar concerns as the parents and wanted increasing tutoring and mentoring activities to provide students with supports that would result in high school graduation, promotion with age-peers, and allow for post-secondary education to continue. The staff also pointed out that "in-service" day programming would be a great help and allow them to be more focused in these trainings. These survey determined needs are ones that can be addressed in the 21CCLC program when using ACE PRIME Blueprint concepts to provide a framework for services in the four quadrants. The specific design of each center 21CCLC will be influenced by the center taskforce made up of students, parents, staff, and community members with a connection to that campus. The taskforce will meet to select part of the programs to be done at the center that will extend the framework services that will be done. The site coordinator will be voting member of the campus taskforce with the director, family involvement, and differentiated / extend coordinator being consulting non-voting members. The district taskforce will include members from all the campus' taskforce. The district taskforce will set overall consortium goals that align to the TEA requirements and DIP needs. The ten center taskforces will align with CIP and specific ongoing local determined needs. This will assure that each campus is meeting their student and parent needs while having an overall district plan. The budget and management / program plans were developed using Dr. Frye's history of creating five successful 21CCLC programs that not only remediate student needs but accelerates their development. Additionally, because of previous grant and joint staff development programs done among the districts, we looked at the funds that could be leveraged to allow for sustainability and leveraging consortium resources. The basic framework will be to have Homework Helpers to allow students and parents to have a before and after school time to get assignments completed, Understanding Your Kids/Parent/Teacher so that counseling and guidance programs can be done for all stakeholders, Eating and Being Fit a program designed to increase fitness activities while promoting healthy eating habits, Academic Tutoring and Acceleration program designed to fill in gaps in knowledge while accelerating student who are behind age-peers for graduation and promotion, and Taskforce designed campus specific programs that will allow unique campus needs to be met. This system allows local campus needs to be address, provide overall management framework to meet TEA goals, and allow students to accelerate their academic progress along with social/emotional along with other positive life goals. General community data is given on Schedule 12 under specific ISDs information but in general the rural nature of the ISDs and depressed economies has led to development of the programs focused on increase educational outcomes and linking stakeholders to the WorkForce Board programs. Catholic Charities, Lubbock Literacy & Family Guidance partners can provide focused services that were seen as lacking in results from general focus groups and survey done with various programs. Practice wisdom, data, and research have aided in development of a 21CCLC framework that is designed to increase equitable access with full community involvement and create boarder systems for meeting community needs while providing a "new" educational system.

Schedule #13—Needs Assessment

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Part 1: Process Description. A needs assessment is a systematic process for identifying and prioritizing needs and resources. Needs are defined as the area, or gap, between current performance and the desired result. Describe the process for objectively assessing the needs and resources for this program, including a description of the process for prioritizing multiple needs and aligning proposed activities to meet the needs, including the needs of working families. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The determination of the general needs of consortium and the specific campuses began with the CIP/DIP of each district. These working documents provide a framework for each campus to improve student outcomes on a range of academic and social / emotional items while increasing the linkage of the parents to their child's campus and increasing equitable access to services and learning opportunities. The CIP/DIP includes information from the STAAR tests and the TARP (Texas Academic Performance Reports) which establish general academic needs of our students. The consortium members have had mixed results in increasing students outcomes - CCISD has upward trends, LISD & MISD have mixed results, and OISD has a need for improvement. In general, we still have a need to improve College and Career Readiness for our students (specific data pages 14-17). The information about obtaining post-secondary readiness for our students demonstrates that while our students are "taking" the classes they are not gaining knowledge and skills at a level that meets or exceeds state averages. Give the demographics of our students helping them accelerate their skills will give them the push that they need to be one of those first generation college students. We saw the 21CCLC program as a method to extend and enrich the academics of our students while the family component would allow our families to see their children going on to school to obtain industry certifications and/or college degrees. The 21CCLC total program will give our stakeholders the supports that they need to change the culture of Littlefield, Cotton Center, Muleshoe, and O'Donnell to one nurturing STEM (Science Technology Engineering Math) careers, with students becoming Control Agents of Their Own Learning to become life-long learners, while raising of general community expectations, etc. This will allow our consortium to build the community support that will allow the successful items of the 21CCLC program to be built into the CIP/DIP to begin the sustaining process.

Information from City-Data.com (pages 14-17) was used as an objective provider of general community needs. Cotton Center because of its size, less than 180 people, can only said to be similar to these three of rural communities from discussion with stakeholders. The general need was access to economic resources along with general lower education outcomes for the people from these communities. The student academic performance data for the students showed they would benefit. These items establish how our 21CCLC program since it will focus on College and Career Readiness will help meet this general community need to raise educational outcomes. We are partnering with the Texas WorkForce Board to allow both the students and their parents to have a better understanding of how CTE (Career and Technology Education) endorsements can help all students have better access to economic resources. The general crime data established the need for social emotional supports to lower these behaviors. All of these items were confirmed by the stakeholder surveys that were sent home with all students, staff, and general community members.

Approximately 3,325 surveys were sent home and with the one returned after spring break we have received almost 450 and had almost 100 people give information to contact them about being on the campus and district taskforce committees. The survey reflected the need for a safe environment for students (staff and parents) that would help them have success at school. Parents want to have programming that would allow them to finish work and they asked to have parental programs that occurred after 6pm so that they could be a larger part of their child's school life. The parent also wanted homework help because they stated they did not always understand what their child needed to learn. The use of the 21CCLC program was seen as something that would allow the students to have access to technology in a manner that would increase their understanding of what was being taught. All stakeholders liked the College and Career Readiness items and thought the link with the WorkForce Board might help in a real world manner. The STEM areas of studies were an area that the parents wanted help because they felt that their children's understanding of these field would help them be more successful. Parents of younger children focused on either giving their child a "head start" or extra instruction to have a better base of skills to have more success as they moved up the grade levels. They also felt that they would be able to have their child come to the program on a regular basis if programming continued until they got off work. Stakeholders were favorable in serving on the taskforce since it would be able to focus money from the grant to meet real community needs. They saw this as a way their campus could affect changes that they wanted to see at school. They also felt that each campus and the consortium having a taskforce would assure that specific center needs were being addressed to better serve the students.

Part 2: Alignment with Grant Goals and Objectives. List the five highest-priority "Identified Needs", in order of importance with 1 being the highest level of importance, that the needs assessment process produced. Describe how this proposal would effectively address the need and attain the desired result, including the needs of working families. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

#	Identified Need	How Implemented Grant Program Would Address
1.	College and Career Readiness increase services and improvements to allow students to have CTE Endorsements and real world experiences that will extend the regular day instruction through links with the local WorkForce Board. The local board does have additional programs that can aid parents in obtaining better jobs that will be a leveraged service that allows parental programs for 21CCLC.	Extending of the regular day instruction with focused CTE programs in association with WorkForce Board and local businesses to allow the 8 Components of College and Career Readiness (CollegeBoard Advocacy & Policy Center, 2014) to be met. 8th grade students with their parents will create PGP (Personal Graduation Plan) that will allow them to have high school plan of courses to allow them to have postsecondary readiness and an effective framework for completing high school.
2.	Improve Academic Performance by providing academic and other supports that will increase STAAR performance and gaining of promotion and graduation credits so that students remain or are accelerated to join their age-peers. Systems will be used that promotes attendance, positive life choices, and general supports designed to support student academic needs (Smink & Reimer, 2005). The Taskforce at each campus and the district will aid in the creation of 21CCLC programs (e.g. Character Education, Positive Action, Tutoring, Mentoring, Fitness Services, etc.). These program will be designed to support sub-groups of students in terms of differentiated instruction and special populations (GT to ID) supporting services designed to allow each student's individual needs to be met (Kingore, 2011).	Having the following initial programs: Homework Helpers, General academic tutoring, STAAR/EOC prep, IT-based remediation and acceleration programs, Peer and community mentoring on academic items, having teacher / service provider developed academic enrichment items, and 6 total weeks of summer programs. This system has allowed needs of past centers to be met while creating a culture that develops life-long learners who are successful in postsecondary educational and career pursuits. The PEIMS system is used to provide 3-week reports on 21CCLC grades, attendance, & behavior and those found in need of additional support are asked to come to other programs. Having students & parents on the 21CCLC Taskforces that they can help design the ongoing program offerings at their centers to assure student usage, and integrating family members into the overall program to gain their support.
3.	Students Controlling Agents of Their Own Learning that promotes students understanding that they are moving to information based economy that having the ability to use and evaluate facts will allow them to have successful and multi-careers. The 21CCLC will allow our students to use multi-content areas to produce real world products that promote them understanding that learning (e.g. school) will be an ongoing activity (Increasing Educational Productivity, U.S. Dept of Ed, 2015). This will allow them to be College and Career Ready.	Student 9-12 will use their PGP that the 21CCLC programs will support. The staff at the high school campuses and Site Coordinators will track academic progress for all students. The Career and College Readiness systems will be supported by the 21CCLC program so that each student sees the value of graduation and postsecondary college and career certification activities. The parents will have programs that aid them in supporting their students, understand the value of ongoing academic preparations, obtaining certifications & degrees, and the various methods to pay for the postsecondary activities.
4.	General social/emotional support and aiding families in having their needs met to promote limiting the non-academic factors that have negative effects on students' school performance. These support services allow the families to see the school as a center of the community that is there to improve the general success of all stakeholders (Moffat, 2011)	The 21CCLC with our partners will provide non-traditional supports by connecting families to area service providers to allow these needs to be met. By limiting negative effects outside such as non-academic family needs, the students will be able to obtain more benefits from the regular and 21CCLC educational programs. This will support the sustainability of the program by building consortiums that can seek other funds while link community members' efforts.

Schedule #14—Management Plan					
County-district number or vendor ID: 140-904				Amendment # (for amendments only):	
Part 1: Staff Qualifications. List the titles of the primary project personnel and any external consultants projected to be involved in the implementation and delivery of the program, along with desired qualifications, experience, and any requested certifications. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.					
#	Title	Desired Qualifications, Experience, Certifications			
1.	Project Director	Bachelors Degree (Masters preferred) in education or related field with experience in working with targeted student type and administration experience. Experience in education of targeted youth can be used for education.			
2.	Site Coordinator(s)	Associate's Degree in education or related field, Strong organization and time management skills, High degree of computer proficiency using Microsoft Office, Ability to communicate in native language(s) of program recipients, Experience working with high risk youth and Knowledge of community resources and experience can be used for education.			
3.	Family Engagement Specialist	Bachelors Degree in education or related field (Master preferred), familiar with the community & support agencies, Flexible hours to accommodate work in the evening, Experience working in an educational, social service, or family support service setting in diverse culture and economic settings, and Knowledge of child development and effective parenting techniques			
4.	Coor Differentiated and Extended Instruction	Masters Degree in education or related fields (doctorate preferred), multi-content area certification with special population certifications, professional (counseling, diagnostician, etc.) experience in working with 21CCLC programs			
5.	Evaluator	Experience in evaluation of 21CCLC programs and documented history of working with school districts in similar programs.			
Part 2: Milestones and Timeline. Summarize the major objectives of the planned project, along with defined milestones and projected timelines. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.					
#	Objective	Milestone		Begin Activity	End Activity
1.	Pre-start date hiring and seeking bids	1.	Ads ran for grant staff and general program supplies / equipment	Grant Awarded	08/05/2016
		2.	Dr Frye works with consortium to begin programs and form the Taskforce pre-award so that input from all stakeholder is obtained and the 21CCLC activities are ready for the 8/1 start date.	Grant Awarded	08/10/2016
		3.	The 21CCLC is integrated into the CIP/DIP yearly modifications to start building this link.	Grant Awarded	08/01/2016
2.	21CCLC programming integrated into consortium's campuses	1.	21CCLC awareness and program offerings featured in the start of year staff develop	08/01/2016	08/19/2016
		2.	Center Coordinators introduce themselves and services to the campus instruction and support staff	08/01/2016	08/19/2016
		3.	Letter send home to parents to obtain permission and inform about the start of the 21CCLC	08/22/2016	08/31/2016
		4.	Fall term of 21CCLC program begun	08/29/2016	12/16/2016
		5.	Taskforces formed for each of the campuses and district	08/22/2016	09/15/2016
3.	Fall Term formative effects determined (systems developed for Summative Evaluation)	1.	Center Coordinators provide TEA with enrollment data and work with other grant staff to evaluate the effects of the program to improve day-to-day functioning and see if goals being met.	09/21/2016	12/16/2016
		2.	Three week grade, attendance, and discipline data obtained from PEIMS staff to determine what the students in the program	09/19/2016	12/09/2016
		3.	Spring Term systems improved/continued	12/09/2016	01/09/2017
Unless pre-award costs are specifically approved by TEA, grant funds will be used to pay only for activities occurring between the beginning and ending dates of the grant, as specified on the Notice of Grant Award.

Schedule #14—Management Plan (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Part 3: Feedback and Continuous Improvement. Describe the process and procedures your organization currently has in place for monitoring the attainment of goals and objectives. Include a description of how the plan for attaining goals and objectives is adjusted when necessary and how changes are communicated to administrative staff, teachers, students, parents, and members of the community. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The programs designed to meet the four critical success factors of: 1-Student and Family Engagement, 2-School Involvement, 3-Assessment Data, and 4-Professional Development Impact will be tracked by the Site Coordinators with summary reports given to the Project Director. The information collected will be "are there programs for each of these items having a real effect on the campus(es)?" The tracking of information will be based on the reporting performance goals of the grant. The tracking of information will be based on the reporting performance goals of the grant. Examples #1 Innovative instructional techniques for academic and enrichment activities based on research and best practices, #2 Provide adult advocates, based on student need and in accordance with best practices, #3 Conduct ongoing/continuous assessment to determine need and improve targeted services, and #4 Provide all required training opportunities for staff development that where possible includes family members. These examples provide a framework, with the use of the Taskforce, to assure that for students, parents/family members, ISDs staff, and community stakeholders that milestones are being met. The items will be done within the ACE PRIME Blueprint system #1 Activity Tracking, #2 Number of contacts made with families, teachers, school day staff, #3 Methods of assessment: pre/ post tests, needs assessments, case plans, etc. within the PRIME Assessment system, and #4 Number and schedule of trainings, staff / parent / community stakeholders sign in sheets, and MyTexasACE Training attended. The tracking of these items will keep the four critical success factors as a top priority of the 21CCLC staff and allow us to determine in adequate progress is being made in attaining the grant goals for each of these factors. All of these items will be integrated into the CIP/DIP to assure that the culture of the campuses and districts are changed to reflect the integration of the 21CCLC goals into the regular school day programs. This will allow a sustainability system to be created and give a formative system of evaluation where changes can be made in the day-to-day operations of the program to meet the set milestones of increase student academic performance and attendance while lowering discipline referrals. The students academic performance improvements is normally the single most important factor for an ISD, but the inclusion of the other three measures with the Family Engagement Specialist will allow the ISD's to take a holistic approach to meeting all the family/community needs that effect educational outcomes but normally are not addressed. This full system of approach the whole student/family/community needs will help consortium members to develop best practice model for the integration of 21CCLC into the regular school day.

Part 4: Sustainability and Commitment. Describe any existing or planned efforts that are similar or related to this proposal. How will the applicant coordinate with these efforts toward maximizing the effectiveness of grant funds and build sustainability over time? How will you build long-term support and commitment from partners in these efforts and other partners over time? Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

Dr. Frye will work with the schools to expand systems to seek of non-traditional funds to be paired with local funds. The 21CCLC program evaluations will be integrated into the CIP/DIP of each of the ISD's that allows local tax-based funds to be used to sustain various aspects of the program while helping to change the culture of the campuses to see afterschool activities as a logical extension of t regular day. The customized program of grant writing instead of writing a grant for a program that Dr. Frye creates allows consortium members, with the building of community support with the Taskforce and other community partners, wrap around extra programs obtained and sustained because of the various consortium communities organizations coming together with a common goal of raising educational outcomes for all of our students. This overall concept allows our stakeholders to join together to apply for federal, state, & foundation grants and be competitive in the new world. Our leveraging of local funds through the CIP/DIP integration and planning to leverage non-school partners' resources. We believe we have developed a real system for sustaining the 21CCLC services because the whole of each of the communities see the value in working together to achieve a common goal. The building of these multi-consortiums is key to building systems that can seek larger Federal/Foundation grants because the number of students and other stakeholders is greatly increased. We will also have local non-school district resources from our partners that will be available because of these partnerships that we are developing. Extra services to our families will allow our partners to have access to a larger number of people who will see benefits of the programs and are willing to donate to maintain the 21CCLC programs. This system will further promote equal access for all the community members because they will be support our program.

Schedule #15—Project Evaluation

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Part 1: Evaluation Design. List the research methods and processes you will use on an ongoing basis to examine the effectiveness of project strategies, including the indicators of program accomplishment that are associated with each. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

#	Evaluation Method/Process	Associated Indicator of Accomplishment	
1.	21CCLC staff will work with the campus administrators, teachers, and CIP/DIP teams to obtain good data	1.	By the end of the first semester we will have template for the system of evaluation for staff develop and its effects on students
		2.	The system of evaluation will be done bi-weekly by 21CCLC team meeting initially.
2.	We will collect a wide-range of information that will provide data on effectiveness of the program	1.	Staff development on collection and use of data done in the 21CCLC program
		2.	Curriculum pedagogical data obtained and used to inform continuing efforts
		3.	PEIMS data used to provide overall objective measure of effects of 21CCLC
		4.	General CIP/DIP data gather integrated into the 21CCLC program
3.	Central Office staff provide the assessment of effects of the 21CCLC programs and extends this to all the staff at schools	1.	Teachers demonstrate they are using the data to drive their instruction
		2.	The staff trains in our standard professional development all staff in these methods of using data to drive teaching and professional growth
		3.	The effective TLP programs are integrated into the CIP/DIP
4.	The data collected will be evaluation in on going manner to assure rigor and effectiveness	1.	Staff with campus/district staff will regularly meet to determine that these data are providing "good" information to improve the program in a timely manner and improve the CIP/DIP and the 21CCLC program.

Part 2: Data Collection and Problem Correction. Describe the processes for collecting data that are included in the evaluation design, including program-level data such as program activities and the number of participants served, and student-level academic data, including achievement results and attendance data. How will findings be used to refine, improve, and strengthen the program? How will findings be made available to the public? Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

Quantitative Data Collection:

- * 21CCLC data and reports,
- *Teacher, student, parent surveys
- *Texas Academic Performance reports
- *Internal Monitoring Reports
- *Pre-post assessments
- *Class grades and Discipline referrals

Qualitative Data Collection:

- *Internal interviews with staff, administration, teachers, and students
- *Focus groups with parents, community members, and students
- *PEIMS reports and Observation of student activities
- * Review 21CCLC staff comments and concerns
- * Review of the CIP/DIP process
- * Compare results with the strategic plan, strategies, and actions

The administrators & taskforce will be copied on reports generated by grant staff. The students' STARR/EOC benchmarks, former scores, and current year testing results will be supplied. The staff will report more antidotal information on the professional growth of the staff and its effects on students. The timeline is to have monthly staff/evaluator meeting to discuss ongoing evaluation along with the data and other timelines. The evaluator will engage in the following: Prepare the evaluation plan, Develop the evaluation instruments, Identify the program participants who will complete the evaluation instruments, Monitor school records data, including student grades, STAAR/EOC scores, school attendance, and disciplinary actions at the end of each school year, Review evaluation progress and results with program staff, Provide support in gathering quantitative and qualitative data on students in the program from 21CCLC, school-based student data systems, results of internal monitoring activities, and surveys/focus groups, Analyze all gathered data from data analysis and provide recommendations for continuous program improvement, Provide community meetings and to taskforce "next steps" with each conclusion, Provide semi-annual reports, Provide a Final Yearly Report (FYR), Assist in completing the districts FYR, Present the evaluation results to designated parties in a timely manner, Help staff create improvement plans based on findings from internal monitoring, Assist centers in administering student, parent, and teacher surveys (primary effort for administering surveys rests with grantee), Provide an annual report, supplementing the FYR, linked to program objectives, Reporting at the basic evaluation level typically includes the following elements, Analysis of results from surveys administered by staff, Changes in outcomes over time, Data from the internal monitoring process, Demographics data, and Enrollment data. The CIP/DIP process and timelines will use the evaluator's reports for integration into these plans. This is being done so that the items found to be effective at raising staff skills are demonstrated in student achievement and increasing family involvement, Evaluation will utilize formal and informal observations to assess program effectiveness within a "tiered-approach" to increase the richness of the formative and summative evaluations.

Schedule #16—Responses to Statutory Requirements

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Statutory Requirement 1: Describe the activities to be funded. Specifically explain the supplemental nature of the activities. Include a description of how students participating in the program will travel safely to and from the center and home. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The students will be transported by the ISD buses and/or parents to the locations. The current campuses of the students are where the 21CCLC program will be done. The before school program will be Homework Helpers, to allow for all students to have a system of aid to complete all classroom assignments, and English Language Arts (ELA) enrichment of reading and related items. Homework Helpers a before-/after-school program designed to help student finish regular day assignments. This has been effective in raising student's grades, promotion and graduation credits while building good will for the 21CCLC staff among the regular day staff. General academic tutoring across the subjects' areas done by ISD staff and vendors which have been found to extend the regular day instruction into real world setting while giving student more time on task and having a general RTI (Response To Intervention) program. STAAR/EOC prep for students whose benchmark scores or performance on past TAKS/STAAR test have shown that they might be in danger of failing one or more tests. This system has allowed the districts that have been in previous 21CCLC grants to improve their overall student performance. IT-based remediation and acceleration programs use software and hardware to provide student with another method of learning material along with providing RTI resources. This integration allows students to regain graduation credits if they are behind age-peers or acquire specific skill sets that have been missed. Peer and community mentoring on academic items have been found to connect at-risk students and their families to another caring person who can focus on and direct these stakeholders to additional community services while improving the student's grades. Teacher / service provider developed academic enrichment items provide a real world method of linking the school day learning to an applied or extension activity. An example is the LEGO Robotics program which provides the student with a way to use what they learned in math/science classes (STEAM) in a real world manner. The summer enrichment programs and fitness activities will be used to integrate activities for both the students and their family members. We have found that this increases the regular attendance at the 21CCLC programs while better meeting the needs of the stakeholder for additional service. This will provide our consortium with a method to increase the family involvement while having a system for the Taskforces have real input into the future design of the day-to-day program activities. This basic framework of service has been developed over the last nine years of having 21CCLC funded program and will allow this consortium to provide effective services to meet the goals of this program from the first day of grant funding and assure that student are safe coming to, at, and leaving.

Statutory Requirement 2: Describe how the eligible entity will disseminate information about the community learning center, including its location, to the community in a manner that is understandable and accessible. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The first method of "telling" the larger set of community stakeholders about the 21CCLC program occurred with the needs survey that was sent home with every student at the seven centers and available to community members. This system, taking into account the rural nature of the consortium, should extend awareness of the grant proposal development to most of the stakeholders and to all of the student/families who would be the users of the program. When awarded the campuses will use their reader boards, newsletters, and other local community bulletin boards to publish information about the programs. The campus newsletters and web-pages will be used inform their stakeholders when the grant is funded about the extra programs the 21CCLC grant will provide. We will plan for 6-weeks Celebration of Student Achievement. This system has been effective at increasing parental / family involvement with the centers. We will use the local news-outlets to have student create stories about what the 21CCLC has done for them. The campus newsletters and reader boards will be used to announce the 21CCLC program. This will assure that all to the students and their families are aware of the programs that will be done for their campus. These local announcements will be paired with the "Light On" national program so that people who might be moving into these areas will know that there is a 21CCLC program. Last, each of the school districts will be included on their web-pages so that there is a web-presence for the program. The yearly school district report card informational meeting will include information on the 21CCLC effects in raising student achievement. The taskforce members will be community ambassadors to the general community. The members will inform the public about the services and the effects of the program. They will also use these encounters to ask the public about what programs that they would like to see in addition to current ones have other community needs met and link the community to the 21CCLC. The superintendents will work with their school boards to assure that the there is a general understanding of the 21CCLC program and that the consortium wishes to use it to meet as many community needs as possible while increasing our students' academic outcomes.

By TEA staff person:

Schedule #16—Responses to Statutory Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Statutory Requirement 3: Describe how the proposed activities are expected to improve campus and student academic achievement, as well as overall student success. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The direct academic services like Homework Helpers, STAAR/EOC-prep, General Academic Enrichment, etc. will provide the students with extra time and help to complete assignments, gain skills needed to pass the state high stakes testing, and have additional time-on-task to expand their understanding of TEKS (Texas Essential Knowledge and Skills) related to the courses that they taking. These items will improve academic achievement by providing services that are directly tied to the day-to-day academic items at the consortium. These programs are designed to give students either missing skills and/or reinforce the classroom instruction. The family service will increase the student academic performance in the following ways. The Family Engagement Specialist with the district home liaison staff will work to increase the connections the parent(s)/family members of the students have to the campus. This linkage will greatly increase the "parents" involvement with the campus and their child's education. Conway and Houtenville (2008) stated, "Parental effort is consistently associated with higher levels of achievement, and the magnitude of the effect of parental effort is substantial. We found that schools would need to increase per-pupil spending by more than \$1,000 in order to achieve the same results that are gained with parental involvement." Jaynes (2005) in a Harvard Family Research Project meta-analysis of 77 studies of the effects of parental involvement supported this statement. Since our programs will be meeting specific family need, we believe that we can form a strong connection of the parents to the campus which will translate into the parents/families feeling welcomed at the campuses and therefore more involved in their child(ren)'s education. Wellness means being healthy in mind and body. Student success depends on a blend of academic skills, good health, and physical and mental fitness. Black (2006) indicates that school-based physical activity may help improve students' grades and test scores and positively affect other factors that influence academic achievement. The fitness programs of the 21CCLC will promote positive life style choices that will increase the academic ability of the students by increase their general health and well-being. The linkage of the families to other social services providers will allow the families to have a more stable home life. In other words, to paraphrase - if Johnny lives at the same apartment for the school year, has lights that come on, food in the "frig", and parents who get the extra help they need, he should be able to learn. We have found in the previously funded grants that with a stable home life that the ISD's helped to create the families are more involved with the school and their children learn better.

The "Real World" extensions for the academic information taught in the regular day which our 21CCLC program is designed to do. This linkage to the WorkForce Boards will give our students an answer to the question "When will I use this in the real world?" because of the boarder linkage to College and Career Readiness. When the class ends, students should be able to do more than just pass the final test. They should have gained knowledge in the subject, and they should see how that subject fits into the bigger picture that includes personal professional goals and relationships. Creative instruction is needed to help students see these links. Michele Kane (2009) Northwest Regional Educational Laboratory "Real-World Experiences Can Revitalize Teaching" stated that this focus brings education into the 21st Century which aligns to our goal of creating life-long learners. Within this system we use 'Student Rotations' for tutorials and enrichment activities so that student attendance is increased and the 21CCLC activities are different from the regular school day to assure that a wider range of student needs are met.

Statutory Requirement 4: Identify the federal, state, and local programs that will be coordinated with the proposed program and explain how the proposed coordination makes the most effective use of public resources. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The consortium will leverage our Title 1, other grants, and local funding to help support the 21CCLC programming. This will be done by having services that come from these items being linked to the afterschool programs. Also, part of the operations of the building and transportation will be leveraged. Last, Dr. Frye, at no cost to the consortium, will engage in seeking other grants and donations that can be linked to the 21CCLC program built on concepts in his book on creating educational foundations. The consortium member who have had 21CCLC grant will already have access to those grant and/or local district resources to increase the use of technology to promote the Control Agent student involvement in their life-long learning. Dr. Frye will expand our current system of seeking non-traditional funding sources to build on Dr. Frye's history of partnering school districts and charter systems to receive over \$53 million in competitive grants over the last 16 years. The linkage of the 21CCLC grant to the CIP/DIP will provide access to the local tax base to sustain the successful parts of the program. All of these items along with the community members on the Taskforce will give consortium members access to many non-traditional resources to sustain the program.

By TEA staff person:

Schedule #16—Responses to Statutory Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Statutory Requirement 5: Describe how the activities will meet the measures of effectiveness described in the authorizing statute. Specifically describe: 1) how the proposed activities are based on an objective set of measures designed to increase high-quality academic enrichment opportunities; 2) references to evidence-based research that supports the design of the program or activity; and 3) a summary of the plan to collect local data for continuous assessment and local program evaluation. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The PEIMS student data system will be used at the campuses each 6-week obtain the grades, attendance, and discipline referrals of the students in the 21CCLC program. This will give us a system to determine the progress of our students compared to the goals of the program to have life-long learners which can be operationalized as students passing all of the classes, attending school on almost every day basis, and not having any behavioral problems. These data will be supplemented by antidotal reports from the regular and afterschool staff that will give us less objective but needed data to assure that student needs are being met by the 21CCLC program. The surveys are providing us with the list of activities in each of four areas of Academic Assistance, Enrichment, Family and Parental Support Services, and College and Workforce Readiness that our communities see as needed. This community specific information combined with the history from our previous funded grants will allow the programs that have been found to work to be integrated in the cycle 9 grant into the CIP/DIP for sustainability. Further, the system of changing the specific program items to better meet the needs of the targeted students/families/staff has been established. Last, we will use the PRIME Blueprint for Texas ACE (Afterschool Centers on Education) as a guide for assuring that we align with state standards and the 21CCLC framework for creating a world class afterschool program. Coffield, Moseley, Hall, and Ecclestone (2004) found that when looking at P-16 education that the effective use of learning styles for instruction across the three main groupings of visual, auditory, and tactile/kinesthetic produced better results throughout preK-12 public to the undergraduate degree. Diedrich, McElvain, and Kaufman (2005) found that Afterschool programs are a proven way to reach the neediest students in meaningful ways while considering their varied backgrounds and cultures. These programs help provide additional support to struggling learners, reduce drug use, and prevent violence and youth crime. Poe (2010) found that family involvement in afterschool programs yields benefits for young people, from greater involvement in school events to increased family assistance with homework. The inclusion of the families in the afterschool programs brought an understanding between the home and school that greatly benefited the students and helped form relationships among the groups that would not otherwise have been possible. From a report by the San Diego Office of Education (2004) on closing achievement gaps among sub-groups of students, it was found that extending the learning time for students help in closing the objectively measured academic performance among sub-groups of students. Consortium members have budgeted additional funds to obtain other data on the students and the 21CCLC program which will allow objective measures to be determined that provide the evidence to base programmatic services. This will allow evidence of student success in meeting their stated needs to drive changes in the program. The consortium members will use the TAIS (Texas Accountability Intervention System -

<http://www.tcdss.net/tcdss/tais.html>) Guidance Documents are a resource to support all LEAs and campuses in the continuous improvement process. The documents include best practice research, step-by-step processes and useful tips for engaging in data analysis, needs assessment, improvement planning, and implementation and monitoring activities for any LEA or campus. This system provides a framework that can be used regardless of the staff members to provide a system that full uses the various data and consortium members infrastructural items to improve the performance on the campus. This will help the culture of the campus to be changed in a manner that will support the total efforts of building a sound College and Career Readiness base for the middle school students. This will allow our students to have greater success in high school and aid them in having better career outcomes that will allow our communities of Littlefield, Cotton Center, Muleshoe, and O'Donnell to change our cultures for the better!

Schedule #16—Responses to Statutory Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Statutory Requirement 6: Describe the partnership between local educational agencies, community-based organizations, and other public or private entities in carrying out the proposed program. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

☒ **Check this box IF you are applying for priority points** for submitting this application jointly with eligible entities consisting of not less than one local education agency receiving funds under Part A of Title I and another eligible entity.

☐ **Check this box only IF you did not check the box above AND you are requesting that TEA provide the same priority points** because of the applicant's inability to partner with a CBO within reasonable geographic proximity and of sufficient quality to meet the requirements of the grant.

The consortium is partnering with Catholic Charities of Lubbock, Family Guidance & Outreach Center of Lubbock, Lubbock Literacy, and WorkForce Board of Lubbock. These partners provided Joint Submission letters - attached. Each of the organizations is providing services to the students, parents, and staff that align with their missions.

Catholic Charities of Lubbock is providing counseling, pantry, and related services to our families. They will have programs at the centers to showcase these items. Further, they have a retail sale center where they have made items available to families who have life event such as house fire. Allowing the temporal needs of the family to be met and allowed the students to still be focused on school because their life needs are being met. Catholic Charities has been a partner in past grants and have developed a solid working relationship with Dr. Frye.

Family Guidance & Outreach Center of Lubbock is a new partner that comes from their Executive Director being a former Site Coordinator in one of Dr. Frye's 21CCLC program. They will be able to have parental ongoing programs at the centers along with providing services to our students. This will allow the families to have another set of people that can help them connect to the centers and have their social emotional needs meet.

WorkForce Board of Lubbock is another new partner that was sought out because of the initial needs determine for this grant in terms of College and Career Readiness. The WorkForce Board has the ability to aid in the coordination of CTE Endorsement programs and provide additional service through their other grants to the students and parents. This linkage will allow our students to see a real world reason of why they are learning items - answering that question "When will I use this?" in very clear terms.

Lubbock Literacy has as its mission increasing the number of children and parents that read together. Their programs allow early literacy skills to be obtained by helping new parents have the books and other resources to provide a book rich environment. They also have programs for schools to increase literacy skills of all students. They have access to other resources that will be leveraged. This association will allow our consortium to have another system to increase the ELA skills of our students while involving the parents.

We will also develop more partners in the course of the three years of the program to allow for extra services to be obtained for our stakeholders and support sustainability. We will use the Taskforce members to help us in finding more partners. This will let them see the importance of bringing multi-partners to all work together to improve their community. These efforts will also be used to seek other grants.

Schedule #16—Responses to Statutory Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Statutory Requirement 7: Based on the community needs assessment in Schedule #13, provide a summary of available resources for each proposed community learning center. Describe how the program proposed to be carried out in the center will address the needs identified through the assessment/evaluation process. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

Each of the campuses will provide rooms, Internet, utilities, and normal maintenance items at no charge to the 21CCLC program. The schools will also pro-rate equipment and busing so that more funds can be used for direct student services related to the 21CCLC program. Each district's central office staff will help in the obtaining of data for the program at their schools. The ISDs will be linking their Title 1 and other grant programs to the 21CCLC program. OISD is finishing a cycle 7 grant and will use all the resources from that program in the cycle 9. LISD & MSID were in cycle 5 grant but still have useable materials from that ended grant. The leveraging of resources will be done throughout the three years of this cycle 9 21CCLC program.

The rural and depressed economic conditions of the four rural schools does limit some of the extra resource more affluent school would have but we have one major asset that is directly related to being rural - our schools are the center of the community. We can use this strength to increase parental involvement and finding additional partners for some aspects of the program that we will be building. With the other Lubbock based partners we will also be accessing to expand our school's place in the community.

While the two centers that are "School" or preK-12 single units must service the full range of students and parents. The schools that have a grade focus do have other needs/assets. The centers that are preK-5 have the need to build English Language Art (ELA) skills (teaching student to read and write) and then introduce math/science/social studies skills. Their parents have needs that can be met by the 21CCLC program also because we can help them build ELA skills and understand even if they do not feel that they have the educational background to help their child they are the first teacher. We can help them understand how to support their child's early learning. Inclusion of parent on the taskforce that might not feel they have much to offer in terms of donations will show how by having all sub-populations working towards a common goal we can achieve much more than would be expected when everyone is included and valued. This inclusion will allow us to expand the sense of community that our rural nature builds. All of this aids in building equitable access for all our stakeholders.

The middle grade level centers will utilize experienced families to mentor families that have not had this age group student and help them understand with support we will get through this interesting time in a child's life. We will be able to help create a culture that supports students and teaches treating everyone exactly the same is one of the most unfair things that can be done. In other words we will show these students that everyone is unique but also needs help sometimes and the important thing is to understand what someone else is going through so that we can support them. The social emotional supports at these ages have shown almost as much benefits as direct content instruction because student become more resilient and are willing to keep trying after they fail. This will build resiliency in our students so they can become the Controlling Agent of Their Own Learning and lead to adults who are better able to success in those 12-15 careers that they will have. (Search Institute, 2014)

The high school grade level center will have the various supports with the WorkForce connection and focus on Career and College Readiness to help the student make life choices that will build their educational and work careers. By having various after school program we will let these students explore careers and determine what their interests are for what they want to do to make money. The social/emotional support will let them make a life helping their community and building families that can support their child(ren). This will allow the youth to have the skills to create those 65% of the careers that have yet to be invented. This will help our community to see how they can become a better place to live for all stakeholders.

All the centers have a partner that sometimes feel overwhelmed - the parents. The general lower educational levels of our stakeholders in our communities sometimes makes our parents think they should differ to the "school experts" but we need to help them understand with encouragement and knowledge that they are their child's first teachers and that they will always be the best advocate for their child. This is why we will use the 21CCLC parental programs to support these stakeholders and increase the knowledge of how to engage the "system" to understand the cultures and new world their children will enter. This level of support will raise the expectation in the four communities for postsecondary College and Career obtainment and help us meet the overall needs of our community. This consortium focus will promote equitable access for all our stakeholders because they will all own the program.

Schedule #16—Responses to Statutory Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Statutory Requirement 8: Demonstrate how the applicant will use best practices, including research or evidence-based practices, to provide educational and related activities that will complement and enhance academic performance, achievement, postsecondary and workforce preparation, and positive youth development of the students. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The consortium is linking with the WorkForce Board will allow the workforce preparation to be integrated into our overall system of education. This board is charged with planning for future development of the workforce in our consortium. The state training of the board uses evidence based methods of determining future employment needs and similar methods to improve training in these areas. The CTE Endorsement system provides consortium members another system that is evidence based to provide College and Career Readiness skills to our students that is evidence based (<http://cte.unt.edu/> 2016). The social/emotional support systems have similarly shown that by meeting these needs student have better educational outcomes (<http://www.channing-bete.com/prevention-programs/paths/SEL.html> 2016). Additionally, having students who have increased physical fitness and activities related to fitness and healthy eating have better academic results (<http://www.sparkpe.org/blog/study-physically-active-kids-perform-better-academically/> 2016). Then the various traditional programs developed in the proposal increase all student's abilities to have academic success. All of these items show that consortium's 21CCLC program is using evidence based items for both the traditional and non-traditional academic and other programs that will allow our students in the 21CCLC program to have the needs met and increase their College and Career Readiness.

Dr. Frye's level of TEA certifications 14 teaching and 4 professional (all required subjects preK-14 plus SpEd, ESL, High School Reading, & Psychology along with Regular & SpEd counseling, Educational Diagnostician, & Mid-management) makes him uniquely qualified to enhance academic performance by provide systems and examples of including all sub-populations of student in all the content fields. His research also allows him to provide the framework for using data to drive changes in instruction to better meet the need of all our students. Last, since he started his teaching career as a migrant / SpEd teacher at a small rural school district, he has a personal understanding of our rural schools.

The Catholic Charities, Family Guidance and Lubbock Literacy connections will allow the social/emotional and ELA needs to be met in a manner that includes the parents of our students. This total approach will allow the unique and wide ranging needs of our students and their families to be met.

In the consortium we will use employees of area businesses, church members, retired teachers, community members are at large, and grandparents / parents / other relatives of students in the program to obtain volunteers for the program at our centers. This system that was developed by Dr. Frye in the previously funded 21CCLC grants and should be effect of obtaining stakeholders who want to work with the consortium students. Additionally we will seek volunteers (e.g. pre-service education majors, people seeking social worker degrees, etc.) who can benefit from working with our students, families, and staff. We will seek college students to be mentors in the program to give our students real world examples of people who are using postsecondary educational programs to meet their needs. All of these people will have background checks before working with students to assure our students' safety. The grant staff will meet with the volunteers before they work with students to give them ideas of how they can be effective and aid them in understanding the local school district policies related to working with students in this manner.

Schedule #16—Responses to Statutory Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

Statutory Requirement 10: Describe the preliminary plan for how the community learning center will continue after funding under this program ends. Include the strategies and resources that will be employed, individuals and organizations involved, and an annual timeline for implementing the sustainability plan. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

☒ **Check this box IF you are applying for priority points** for local education agency elected board of education written support for sustainability. Letters must represent a majority of the locally elected board and provide a detailed description of the specific challenges the community faces concerning sustainability and how community and board support will assist local efforts to sustain the program over time. **Letters of support with original signatures AND a list of all elected board members, including those that did not sign or submit a letter, must be attached to this application.**

At the 03/27/2016 the four School Board approved applying for and developing a sustainability plan for the 21CCLC program. Board members are: Littlefield - Gary Birkelbach, Lance Broadhurst, Pat Demel, Boyd McCamish, Adrian Solis, Will Williams, and Richard Thompson; Cotton Center - Clint Carthel, Marilyn Koelder, Shane Berry, Troy Burnett, Richard Walden; Muleshoe - Jared Lee, Jay Cage, Kelly Kettner, Sergio Leal, Curtis Preston, Carroll Precure, Daniel Guzman; O'Donnell - Monty Hancock, Billy Edwards, Amanda Stidham, Trevor Halfmann, Landon Mires, Mark Royce. All members voted in favor of this item and/or signed the attached letter.

The major challenges to sustaining every part of the 21CCLC program will be the depress economy of the consortium members. But the boards agreed to use the CIP/DIP system - which helps determine how local funds are spent - to integrate the successful items of the 21CCLC into these system plans. This will allow the best of the 21CCLC program to have a tax-base system to continue the program.

Additionally Dr. Frye will develop non-traditional method of seeking more resources to increase the type and level of services for our students. This may include establishing a Foundation for the consortium increasing the number and type of program that can be maintained.

Last, the taskforce system will increase the number of community members who have ownership of the program being done at the consortium member schools. This will give another source of support for the programs. We believe that these stakeholders will see that working with the Taskforce and seeing the 21CCLC program in action will allow other in-kind resources to be found that will continue aspects of the program without the need for traditional resources. This will let the community become even more a part of consortium and allow all of us to build a stronger local community ties while understanding the powerful benefit of creating a larger consortium group. These systems also promote equability in access for all stakeholders because they will have real ownership of the overall 21CCLC program.

Schedule #17—Responses to TEA Program Requirements	
County-district number or vendor ID: 140-904	Amendment # (for amendments only):
<p>TEA Program Requirement 1: Community Involvement</p> <p>Describe your plans to seek continuous feedback and involvement from community stakeholders, including the process for creating and engaging a community advisory council in order to increase program awareness, evaluate program effectiveness, and develop annual program and sustainability plans. A description of the planned membership and participating organizations must be provided.</p> <p>Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.</p> <p>Initial stakeholder survey we asked for community members, students, parents, staff, and other community members, if they would be willing to serve on a 21CCLC Taskforce. Approximately 4,200 were set out and of the 650+ returned to date over 110 people said they would serve on the taskforces. We will use a combination of campus, district, and consortium board system to help the site coordinators, grant director, and family involvement specialist receive input from the community and the end users of the 21CCLC services as to what changes that they would like to see to the program to better meet the specific center needs. The external evaluator will work with these staff to develop a system of questions/surveys/focus groups that will allow these changes to be determined. We believe that in the first year of the program we will have more meetings because of the need to adjust the program in a more formative manner during the start-up phase of the centers. The local taskforces will be headed by the Site Coordinator. The minimum number of stakeholders from the "types" of roles we would like to see on the local Task Force would be Students = 3, Parents = 2, Campus staff = 2, and Community members = 2 with the Site Coordinator. We believe that 15-20 Taskforce official members will be the maximum working but will have open meetings where all community members can voice any concern. Also, for sustainability, we may have a sub-group of members whose only role is to see what community resources can be found to donate to the local center. This would allow a system for everyone in the community to have a quasi-official role with the 21CCLC center. The Consortium Taskforce will have 2 members from each of the campus Taskforce or their appointees. This will allow the holistic needs of all consortium members to be met. The role of the Consortium Taskforce will be to assure that a coordinated effort to build best practices and broader non-traditional funding sources can be sought. Will hold open meetings so that all stakeholders who wish to express concerns, give opinions, give suggestion for programming, etc. will be able to have direct input to the board. Last we will use newsletters from each campus to inform all stakeholders with students at a center about the program and provide a system for them to return comments.</p> <p>The CIP and DIP process that involves community stakeholders will be use to assure that the 21CCLC program is integrated into the culture of each of the campuses. This will allow a second system of linking the needs of the community to the day-to-day operations of each of the centers and their campuses. Additionally, this will allow for the integration of the regular day and afterschool programs so that the academic outcome along with career and college readiness of each student is enhanced. The system of surveying the community will be done at the end of the regular school year for the next summer through spring terms. We will have a May survey that extends the information gained from the pre-proposal one sent home in January. This will inform the community that we will be able to begin the 21CCLC program in with the Jump Start program that we are planning for August. The external evaluator will help in the design of the survey so that we can obtain baseline information that will be used over the five years of the grant to determine our effectiveness at meeting community needs. The use of the above Taskforce system and the work of the Foundation & Dr. Frye will allow us to seek non-traditional funding to begin to build a system of support for the 21CCLC program that extends beyond any one grant. Also, we will link the 21CCLC to the CIP's and DIP of LFISD. This will integrate the program into the local funding streams. Also, it will increase the general awareness of the program to all the community stakeholders. Last, since the CIP's and DIP's are used as the standard system for determining the effectiveness of various school day program, we will have a "known" system to determine if the 21CCLC items are providing measurable objective data driven results that show real benefits to our students. The system of evaluation will be used to build a best practice model for the linking of afterschool with regular day school. When we can show that our programs are improving) District / Campus up in the TEA rating, we will be able to look for Department of Education and other foundation funding to support our efforts. This system, in a more basic form, has allowed program items from the cycle 3, 4, 5, 7, & 8 grants that Dr. Frye has developed to be maintained at those schools and lead to the development of the cycle 9 more inclusive systems that we believe will lead to the development of a true best practice model that other school districts can replicate. The consortium members and our community partners believe that the association with our proven development system will allow more services to be obtained by the consortium while sustaining the successful 21CCLC program items because we have a vision of how we all can join to increase everyone's success.</p>	

For TEA Use Only	
Changes on this page have been confirmed with: Via telephone/fax/email (circle as appropriate)	On this date: _____ By TEA staff person: _____

Schedule #17—Responses to TEA Program Requirements

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

TEA Program Requirement 2: Grant Management. Describe your plan to manage the various components of the grant while adhering to all grant requirements and providing high-quality programming for all participants. Specifically describe communication among project staff and the provision of ongoing training and support for all staff. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The evaluation will utilize formal and informal observations to assess program effectiveness, including pre/post-test surveys containing both open and closed questions. Using a "tiered-approach," quantitative and qualitative outcome components will be used along with baseline assessments, benchmarks, and other markers for continuous program assessment and refinement. The evaluation team will meet with program staff to provide ongoing feedback so necessary program adjustments can be made as needed to enhance program outcomes. The day-to-day evaluations will be facilitated by the site coordinators and will work with the staff to improve the program in a continuous manner. The 21CCLC staff and external evaluator will provide data analysis and program linkage of the out-of-school-time programs to the regular evaluation systems of the school districts to assure that students are meeting state standards and are obtaining graduation and promotion credits in a timely manner. They will also coordinate the activities into the overall CIP/DIP process. The goals will be to create an afterschool program that increase student learning, fitness, and belonging while involving more community stakeholder with the grant activities through the mentoring program and other opportunities that will be developed to involve all of the stakeholders in a manner that supports lifelong learning. During the School Report Card the public will be given an overview of this program. Quantitative data will include statistics and information regarding student achievement, academic rigor, student retention, and school climate. Through visits, the evaluation team will use various Qualitative data collection methodologies, such as observation by different evaluators, focus groups, parent-teacher-student surveys, and Likert-type surveys to assess program progress. Written feedback will be provided regularly to stakeholders. Annual Reports required by the TEA and more in-depth annual analyses will be prepared by the external evaluator for review by taskforces. These qualitative data will be combined with quantitative measures that will be obtained from various vendors' day-to-day assessments, teacher generated tests, STAAR/EOC practice test, TARP and testing, and other standardized measures. When taken collectively all of these data points will allow data-driven evidence based decision making to drive changes in the program.

The Project Director will be the "approver" of the data entered in the 21CCLC system. They will review the data entered in to the system by the Site Coordinators. This system also has provided information back to the district/campus staff so that the 21CCLC evaluation data could be used in the updating of the CIP/DIP. The Project Director will monitor the input of the day-to-day data into the TEA system by the Site Coordinators. The Site Coordinators will initially check of the data and will send "hardcopies" of attendance sheets and related sign-in sheets for the 21CCLC program. The current system of school district checks for the PEIMS data will be used to obtain the mass downloads of grades, attendance, and discipline information for the students in the program. If any issues arise with accuracy or timely submission of data, the Project Director will work with appropriate staff to correct the problem. The Project Director will be supported by the current system of integrating grants into the overall funding sources for the consortium/districts.

The PEIMS data systems of the ISD's can generate at 3/6-weeks reporting periods the regular school attendance, grades, and discipline referrals of the students who have attended the 21CCLC program. The Site Coordinators will be entering the 21CCLC attendance and related data. They will also be monitoring daily the before/after school programs. This will allow them to identify what is working and not working at their center. The Project Director will have weekly in person meetings with all the Site Coordinators. This will allow them to share what is working, concerns, and methods for improvement. Each of the Site Coordinator will keep "hardcopies" of student sign-in sheets, teacher comments, and campus leadership concerns/needs. At the 6-week celebrations of student success, the Site Coordinator will provide a report to families concerning what has happened and ask for additional needs. The Site Coordinator with Project Director's assistance will develop articles for the campus newsletters and work of the Taskforce. This will keep all the stakeholders on that campus aware of the 21CCLC program. The consortium will produce a 21CCLC Newsletter that will include all four ISD's. This will be given to all the students at the centers and made available for the CBO's to give to other stakeholders. The combination of 21CCLC programs will be celebrated yearly by tying our program to the National Light On program. The external evaluator will work with these staff to assure that their information is meeting all grant guidelines and is in a form that can be used to align with the CIP/DIP's of the ISD's.

All of these items are designed to change the culture of the campuses and the district to integrate the 21CCLC program into each. This will allow the program to be sustained beyond any one grant's funding and make our students more successful while meeting the needs of their families.

Schedule #17—Responses to TEA Program Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

TEA Program Requirement 3a: Center Operations, Program Coordination. Describe how the program will coordinate with schoolwide programs under ESEA Section 1114 and state compensatory education programs under Texas Education Code, §29.081. Explain how the program will coordinate to identify and recruit students who are most in need of academic assistance and the plan for retaining those students in the program. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

Currently, 21CCLC centers from the grants that Dr. Frye has developed in cycles 3, 4, 5, 7, and 8 have been able to have "open enrollment" without waiting lists in terms of provide services to all students enrolled at the campus(es) and we believe that these ten new centers will be able to operate in the same manner. Some of the specific programs have had to use revolving enrollment where student cycled in and out, but all students did have other programs while they were waiting to cycle into a high demand activity. The site coordinators use their campus' specific policies to include special needs and academically at-risk students in the activities that best meet the students' needs (along with having GT programming). These staff members use each campus' system of public notification and newsletter systems to provide contact with all the families and their students enrolled at each of the campuses. In the yearly enrollment packet the 21CCLC permission and notifications are included. This assures that every student enrolled at each campus has basic awareness concerning the program and that it is open for his or her attendance.

The regular education staff will work with the site coordinators to link students / parents with needs that the 21CCLC grant can meet. This system is used to promote extending services to families so that they have the greatest chance to have favorable "school" outcomes. The additional extended services that providers like WorkForce Board, Catholic Charities, Lubbock Literacy, Family Guidance, etc. bring to the 21CCLC program allows for non-traditional non-educational needs to be met.

We will use the ACE Activity Alignment Form system to create the basic framework for our program and to expand or modify future programs once the Center Taskforce is formed and provides directions for the ongoing 21CCLC activities at each center. We will/have use the ACE Activity Alignment Process in the follow manner: Step 1: List a strategy as designated by item number on the Strategy Development Worksheet. Step 2: Choose an activity to match to the strategy and list the name and description. Step 3: List the Texas ACE Component that the activity addresses along with the target population (if specified). Step 4: Complete the activity form with remaining logistical information. The ACE forms will be given to the Center Taskforce so that they have the same structure for developing program at each of the centers. The items found to be effective at the center will be shared with the other Center Taskforce. The external evaluator will provide feedback to the Center Taskforce on the students' performance on the various measures along with surveying the students and parents/family members as to how well they "like" the center's activities. This information will be used to create a continuous improvement model for each of the center's activities. All of this information will be used in updating the CIP's of the campus(es) of each center. This will be done so that there is an international linkage of the regular and afterschool day programs. This will better meet the needs of the students while building a culture that can sustain the afterschool program beyond this grant's funding.

The planning for the 21CCLC program and the evaluation results will be integrated into each campuses CIP and the school districts DIP. This will allow the program to be sustained beyond any one grant's funding. Also, it will develop a culture where these afterschool programs are integrated into the regular learning so that the goal of developing life-long learners is reached. This integration of the 21CCLC and the CIP/DIP will allow the community stakeholders to see why special grant program are needed and should be supported.

The site coordinators will work with the ISD Center Taskforce and the parents/students of each center to provide ongoing assessment of the program items. This will be done so that each center can develop, modify, and/or create programs that are need by their specific stakeholders. The 21CCLC consortium staff will work with each center to assure that they have the support to effectively develop local programs within the grant guidelines. The staff at each campus will also recommend students for extra support. If we have increased enrollment in any specific activity, students who are seen by the staff and/or other assessments as the most in need of services, will be given preferential placement. The center staff will work to increase the level of service in these cases so that all students can receive services. This will allow the 21CCLC to not singling out any one type of student but serving all the students/families of the campus. This will be another manner that we assure equability in access for all students.

Schedule #17—Responses to TEA Program Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

TEA Program Requirement 3b: Center Operations, Staffing and Schedule. Describe and explain the planned operating and staffing schedule for each center. Include total number of weeks and hours per week per center for the regular school year as well as the required six-week minimum summer programming. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The general schedule for the fall and spring will be to have a five day a week morning program for homework help and ELA enrichment. This gives a place for the parents who go to work early a safe place for their children where they can have academic programs. In the afternoon to have various programs Monday to Thursday until 5:30. Friday is not done because of sports. This system has been perfected by Dr. Frye over the 5 funded cycles he has obtained for consortiums of schools. This gives programming in the fall and spring for at least 12 (and not more than 20) hours per day for at least 18 weeks in the fall and 19 weeks in the spring (since some of these weeks may not be full weeks because days off we only expect to have the 30 weeks need to meet TEA goals). The program has more weeks schedule than 30 but this allows for snow-days and unscheduled/scheduled district holidays. This assures that consortium's 21CCLC will meet the time requirements of TEA for the 21CCLC program and promote regular attenders because parents can count on the program being open before and after school on those days when there is school. The summer program is for 6 weeks with 4 being in June and 2 in August. This system has been found to have the greatest attendance and meet the needs of the communities that have been in the 21CCLC program. The consortium campus Taskforces will determine if there needs to be adjustments in this proposed schedule. They will also have the ability to adjust the time for more programming within the TEA guidelines if they see unmet needs for our students. The summer program in June is a 4 hour morning program to allow for outside fitness enrichment to be done before conditions become too hot. The half day system has produced the most student involvement with the various programs over the years. Again the taskforces can modify this schedule to respond overall needs. Also, given the proximity of the centers some program may be combined for some of the events to allow for more effective use of resources and to allow for any summer building maintenance.

TEA Program Requirement 3c: Center Operations, Safety. Describe the plan for ensuring the safety of all program participants and staff in the program at all times. Include the procedures for sign-in and sign-out for all students at each center and adjunct site. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

Each campus is using its current system of busing students, parents dropping them off at campus, or the students/parents who provide their own way to school. Transportation to all the center will be offered and use the current school district infrastructure. The additional costs for this service will be partially funded with 21CCLC funds. This system is allowing the campuses to create a system where no student or family member will be excluded from the program just because of transportation. If there is a student that needs transportation to attend the 21CCLC a system of transport will be arranged even at the centers that are within walking distance. Extra funding from the changes requested to supplement these costs of transportation will be determined by the taskforces.

Each student will sign a roster when they attend an activity. This will allow the staff to be able to track the attendance of each student. Also, each student will have a parental permission slip signed allowing for them to attend the 21CCLC program. If a student's parent signs them out after they start a 21CCLC activity normal campus procedures will be used to assure that they are being released according to accepted consortium school district's policies. If a student is not signed out of part of the afternoon 21CCLC but does not show attending their activity, the center coordinator will determine why there is a discrepancy and take appropriate actions. Parents will be informed if a student is "skipping" any activities. On field trips normal consortium member's policies will be followed to assure that all students are accounted for and are transported in a safe manner.

Schedule #17—Responses to TEA Program Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

TEA Program Requirement 4a: Activity Planning, Alignment and Quality. Describe how the program will align all activities with the school day curriculum, expose students to meaningful academic content that supports mastery of the Texas Essential Knowledge and Skills (TEKS), and provide opportunities for youth to practice skills through engaging and interactive activities. Describe the plan for using evidence-based practices and local data to meet student needs and achieve the desired campus and student outcomes. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

Coffield, Moseley, Hall, and Ecclestone (2004) found that when looking at P-16 education that the effective use of learning styles for instruction across the three main groupings of visual, auditory, and tactile/kinesthetic produced better results throughout preK-12 public to the undergraduate degree. Diedrich, McElvain, and Kaufman (2005) found that Afterschool programs are a proven way to reach the neediest students in meaningful ways while considering their varied backgrounds and cultures. These programs help provide additional support to struggling learners, reduce drug use, and prevent violence and youth crime. Poe (2010) found that family involvement in afterschool programs yields benefits for young people, from greater involvement in school events to increased family assistance with homework. The inclusion of the families in the afterschool programs brought an understanding between the home and school that greatly benefited the students and helped form relationships among the groups that would not otherwise have been possible. From a report by the San Diego Office of Education (2004) on closing achievement gaps among sub-groups of students, it was found that extending the learning time for students help in closing the objectively measured academic performance among sub-groups of students. From a presentation concerning the effects of Dr. Frye's cycles 3, 4, and 5 21CCLC programs; Hanmon (2009) presented research that showed the integration of these ideas with the day-to-day activities develop at the ISD's and Charter campuses to meet local needs resulted in a general raising of TAKS, STAAR, and class grades, increased attendance, and lowering of discipline problems for student at the 19 ISD and 4 charter campuses that had been in the three grants. This showed that our consortium has a good framework for having a more controlled study of the effects of its system for providing 21CCLC services. The cycle 9 will allow the academic aspects to be blending with the family involvement and preventing juvenile justice involvement items in a more intentional manner. Also, we will be able to extend to a P-20 model of lifelong learning where CTE certification can be a viable part of post-secondary education. Dr. Frye's and our ongoing link to IHE (Institutions of Higher Education) will allow a scholarly study that will increase the knowledge in this area with the goal of developing a best practice model for this type of turn around. The historical research base of the program lies in Dunn and Dunn (1990) work on learning styles which relates to current RTI (Response To Intervention) programs and the following on developing partnerships. "Partnerships must be viewed as an essential component of school organizations that influence student development and learning, rather than as an optimal activity or matter of public relations." (Epstein, Coates, Salinas, Sanders, and Simon, 1997) Effective school-community partnerships can: Extend learning opportunities for students and staff (Otterbourg, 1986); Assist students to succeed in school and life, support staff in their work, and improve school programs and school climate (Institute for Responsive Education, 1996); Positively impact student attendance, aspirations for post-secondary education, enrollment in challenging high school curriculum, and successful transitions from special education to regular classes (Jordan, Orazco, and Averett, 2002); Provide mutually beneficial resources to schools and community partners (U.S. Department of Education, 1993); and Enable schools to become assets for community and economic development (Cahill, 1996). The process of developing community learning centers grant proposal lends itself to the creation of these partnerships in that at each of the three communities. The school staff worked with various community stakeholders to form the programs that are presented in this proposal. In "Help at Last: Developing Effective School-Community Partnerships" a basic roadmap is given for methods of teaming the community and the school that was used in the creation of the centers and the obtaining of the input (RMC Research Corporation, 2002). The link to the WorkForce Board will allow real world College and Career Readiness to be done. Last, we will use the Universal Design for Learning (UDL) with Bring Your Own Device (BYOD) to extend the benefits of IT-base system to all stakeholders by showing students how to effectively use their 'smart devices' to extend their ability to be life-long learners. UDL/BYOD provides multiple means of the learner to acquire information and knowledge, multiple means of the learners to demonstrate their learning, and multiple means of engagement to tap into learners' interests, challenge them appropriately, and motivate them to learn. UDL aligns with the 21CCLC goal of providing a different form of instruction that will extend the students and their parents' experience. This focus on UDL/BYOD is driving the request for mobile IT-platforms to allow carts to be moved among the instructional areas at each of the centers. The Taskforce and PEIMS information will drive the use of this research base to meet the needs of our students and parents along with the linkage to the CIP/DIP to assure afterschool and regular day alignment.

Schedule #17—Responses to TEA Program Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

TEA Program Requirement 4b: Activity Planning, Meeting Student Needs. Describe how the program will ensure that instruction is adaptable to the academic and developmental needs of students, particularly the individual or small-group instruction needs of students, especially focusing on those students who are at risk of academic failure or dropping out of school. Describe the planned staff to student ratios for the proposed sites and activities. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

None of the regular 21CCLC program activities have more than 22:1 student-staff ratio. This is done so that the students receive more one-to-one instruction. For the program activities with this higher ratio we seek to involve community and IHE pre-service students' mentors to lower the overall ratio and provide another career adult to interact with the students. This help each of our student have more of the 40 Developmental Assets that helps them have live success (Benson and Scales, 2004; Benson, Scales, and Roehlkepartain 2011; Geraghty, 2003; Scales and Leffert, 2004; and Roehlkepartain, Benson, and Sesma, 2003). When we link the 21CCLC afterschool program to the concepts of Dunn & Dunn 1990 for meeting different learning styles and the UDL/BYOD concepts (Dalton & Smith, 2013; Hall, Meyer, & Rose, 2012; Roschelle, Courey, Patton, & Murray, 2013; and Tegmark-Chita, Gravel, Serpa, Domings, & Rose, 2012) that use 'smart devises' to provide 24/7/365 access to learning materials; we fully meet the goal of the 21CCLC program to have individualized instruction that meets all student needs while providing them a method to acquire and maintain life-long learning abilities. The UDL/BYOD allows for self-directed one-to-one learning to accrue. We are also using local system of objectively determining student academic growth that aligns to the TEKS and the federal common core. These systems allows each student's academic strengths and weaknesses to be determined and then use the various IT-base programs to meet each student's needs (Cronin, Dahlin, Durant, & Xiang 2010). The linkage to the WorkForce Board will allow more real world College and Career Readiness skills to be developed. This overall system allows the 21CCLC programs to provide instruction to students in a manner that extends the regular day.

The campuses for this cycle 9 21CCLC are all the campuses at all the consortium member schools. The demographics and related information for the centers is as follows: C-1, Littlefield High School 375 students: African American (AA) 8.0%, Hispanic (H) 63.2%, White (W) 27.5%, Other (O) 0.3%; Economically Disadvantaged (ED) 59.2%, English Language Learners (ELL) 2.7%, At-Risk (AR) 50.1%; and College-Ready Graduate (CR) rate for both subjects 96.1%, STAAR at or above Standard: All Subjects (AS) 69%, Reading (R) 60%, Science (S) 85%, & Social Studies (SS) 80%. C-2, Littlefield Junior High - 307: AA 7.5%, H 71.3%, W 18.6%; ED 76.5%; ELL 4.2%; AR 57.3%; CR n/a%, AS 62%, R 72%, M n/a, W 68%, S 47%, SS, 45%. C-3, Littlefield Elementary - 536: AA 6.9%, H 72.9%, W 18.4%; ED 81.3%; ELL 4.4%; AR 38.3%; AS 77%. R 79%, W 85%, S 62%. C-4, Littlefield Primary - 444: AA %, H 70.9%, W 20.7%, O 0.7%; ED 81.1%; ELL 9.7%; AR 30.2%. C-5, Cotton Center School - 112: AA 0.0%, H 62.5%, W 36.6%; ED 78.6%; ELL 2.7%; AR 33.9%; CR 100.0%, AS 87%, R 94%, M 100%, W 87%, S 80%, SS, 73%. C-6, Muleshoe High School - 354: AA 0.0%, H 81.4%, W 17.5%, O 0.8%; ED 79.1%; ELL 7.6%; AR 50.8%; AS 82%, R 72%, M 87%, S 90%, SS, 94%. C-7, Watson Junior High - 300: AA 0.3%, H 84.3%, W 14.7%, O 0.7%; ED 85.3%; ELL 10.0%; AR 51.7%; AS 77%. R 82%, W 81%, S 67%, SS 70%. C-8, Mary Deshazo Elementary - 320: AA 0.6%, H 81.6%, W 16.6%; ED 83.4%; ELL 19.7%; AR 42.8%; AS 66%. R 71%, W 51%, S 65%. C-9, Dillman Elementary - 440: AA 0.9%, H 84.8%, W 14.1%, O 0.2%; ED 90.9%; ELL 35.9%; AR 57.5%. C10 - O'Donnell School - 321: AA 0.3%, H 70.1%, W 29.3%, O 0.3%; ED 76.9%; ELL 6.5%; AR 63.2%; AS 70%, R 76%, M 86%, W 561% S 44%, SS, 75%; CR 85.7%.

While these reported demographics are limited due to space and STAAR score not address for the same reason, the sub-groups and their scores and needs were considered when developing the 21CCLC proposal and the selection of the campuses to be centers. We will use the PEIMS system to generate data every 3-weeks concerning attendance, discipline, and grades that will allow the site coordinators to know the effects of the 21CCLC programs and help move students to our services. The CIP/DIP procedures use similar data and will be integrated into the overall 21CCLC design so that the regular day and afterschool programs are integrated and help more students to succeed. The combination of RTI with UDL/BYOD will allow all sub-populations to have extra programming designed to remediate any academic skill sets they are missing. Also, we will use UDL/BYOD with software to accelerate behind-age-peer students to gain more than one year's academic growth. Last, the counseling and related services will allow the other needs of the families to be met.

Schedule #17—Responses to TEA Program Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

TEA Program Requirement 5a: Family Engagement, Family Engagement Specialist. Describe the role of the required family engagement specialist position in providing families with active and meaningful engagement in their children's education and opportunities for literacy and related educational development. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The Family Engagement Specialist (FES) will be a full-time position with other consortium schools related Home Liaison & Involvement staff helping to support the overall efforts to increase family involvement with the center and the campus. The FES will work with Catholic Charities, Family Guidance, Lubbock Literacy, and other social service providers to develop a system to leverage resources to allow more of the family needs to be met. The FES and the site coordinator will work together to develop a set of afterschool programs to address needs determined by the Taskforce. This will allow the families to have a more active role in the developing of their afterschool involvement programs. Dr. Frye found in his funded cycles of the 21CCLC grant that this was an effective framework for this system. We have found our current family support system results in greater attendance by family members. We predict that a combination of the system will produce a greater sense of ownership of the 21CCLC that leads to greater involvement and attendance. Dr. Frye's evaluation of the cycle 7 grant showed almost a four times greater attendance of parents than was predicted and served over 40% more regular attending students in the afterschool programs. The consortium is using this as evidence that the combined system will increase these aspects of the 21CCLC program. This system will allow consortium to meet real family and student needs because of the increased use of the program. The leveraging of local related staff positions with the 21CCLC positions allowed to general services to be increased. The use of the 21CCLC evaluation information linked to the CIP/DIP process allowed for the culture of the campus to be changed so that increased family involvement was the norm. This helped in sustaining these aspects of the 21CCLC program.

TEA Program Requirement 5b: Family Engagement, Program Coordination. Describe how the family engagement specialist will coordinate with the project director and site coordinator(s) to recruit participant families and assist in the coordination of family engagement strategies across all centers. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The Family Engagement Specialist with the district/campus home liaison staff will work to increase the connections the parent(s)/family members of the students have to the campus. This linkage will greatly increase the "parents" involvement with the campus and their child's education. Conway and Houtenville (2008) stated, "Parental effort is consistently associated with higher levels of achievement, and the magnitude of the effect of parental effort is substantial. We found that schools would need to increase per-pupil spending by more than \$1,000 in order to achieve the same results that are gained with parental involvement." Jaynes (2005) in a Harvard Family Research Project meta-analysis of 77 studies of the effects of parental involvement supported this statement. Since our programs will be meeting specific family need, we believe that we can form a strong connection of the parents to the campus which will translate into the parents/families feeling welcomed at the campuses and therefore more involved in their child(ren)'s education. The Family Engagement Specialist will work with the Project Director to help create a catalog of extra services that are available to the communities along with providing summary of related needs that other grant programs may be able to address. They will also work with the site coordinators to develop center specific programs to address family needs unique to each center. This will allow the general regional resources to be leveraged while having center specific programs to address center defined needs. This system was started by Dr. Frye in cycle 5 and used in cycle 7 & 8 which helped to perfect this method of providing holistic services to our families. This system has been shown to promote equal access by all stakeholders.

Schedule #17—Responses to TEA Program Requirements (cont.)

County-district number or vendor ID: 140-904

Amendment # (for amendments only):

TEA Program Requirement 5c: Family Engagement, Activities. Describe the types of family engagement activities planned, when/where they will be offered, and the identified student and family needs that the activities address. Describe how the planned activities address the needs of working families; provide parents with opportunities for active and meaningful engagement in their children's education; and provide families with opportunities for literacy and related educational development. Describe additional resources that will be used to provide family engagement activities. Response is limited to space provided, front side only. Use Arial font, no smaller than 10 point.

The families will have access from Catholic Charities, Family Guidance, Lubbock Literacy, and WorkForce Board additional services designed to help the non-academic needs of the students and families to be met. We will use the Taskforce to link our 21CCLC to area churches and other social service providers so we can increase the number of providers and the services to our families. The Positive Actions system will be used to provide a general framework for extra general parental support. Each center, in addition to the site coordinator, will have access to their school district's and grant staff current members. This will help support the overall goals of the linking the families to other needed social services and working with the regular day campus staff. The 21CCLC program will use the general IT-support systems of the campus (generally in the campus library) to allow the parents without access to technology to access the Internet. These services will be supplemented by the IT-support for the consortium. This will allow these parents to seek fuller employment and research other information designed to meet their stated needs. The Taskforce will work with the site coordinator to schedule other general parenting and related age appropriate presentations to help parents continue or become their child's first teacher. This will allow each parent to take a more active role in their child's public and post secondary academic development with the aid of the WorkForce Board and the general guidance services of schools. The Taskforce seeking other community social service providers will be used to help the families access other services to meet specific family needs. The families of the students who are not on track to pass STAAR/EOC will be contacted by the site coordinator to be informed of the extra service that the 21CCLC grant can provide to help these students achieve academically. During the celebrations of student success and other special student presentations afterschool the site coordinator will develop newsletters to send home with all students so that the families are aware of how they can become more involved with their campus and the 21CCLC center. Last, during campus goal meetings with parents and teachers, the 21CCLC site coordinator will share information concerning the academics and will include linking with other social service providers so that the families are aware of the additional services provided by this grant. The successful aspects of this parental involvement program will be linked to the CIP/DIP of the ISD's so that a basic cultural change at the campus level can be made in a socially appropriate manner. This will allow the 21CCLC program to increase the general involvement of the families with their campus while linking the more at-risk families to other social services that will allow their children to have the additional support to achieve positive life outcomes. This again promotes equal access by all stakeholders to the 21CCLC programs.
